

ADITYA KUMAR SINGH

Backend Developer | Java | Spring Boot | Microservices | REST APIs

9555546971 | aditya9852046@gmail.com | **Portfolio:** adityasinghportfolia.in | **LinkedIn:** linkedin.com/in/adityasingh78 | **CodeChef:** codechef.com/users/aditya_singh48 | **LeetCode:** leetcode.com/aditya_singh98 | **GitHub:** github.com/aditya9852

SUMMARY

Performance-driven Backend Developer specializing in Java, Spring Boot, and microservices architecture. Experienced in designing scalable backend systems and building high-performance RESTful APIs for distributed systems in Agile environments. Strong foundation in system design, API security, and database optimization. Passionate about developing high-performance, production-ready applications with clean architecture and cloud-native deployment.

EDUCATION

- B.Tech (CSE) from Technocrats Institute of Technology & Science, Bhopal (MP) | CGPA 8.34 | 2021–2025
- 12th (CBSE Board) from DAV Public Sr. Sec. School Bina, Sonbhadra (UP) | 84.6% | 2020
- 10th (CBSE Board) from DAV Public Sr. Sec. School Bina, Sonbhadra (UP) | 91% | 2018

SKILLS SUMMARY

- Languages:** Java, Python, JavaScript
- Backend:** Spring Boot, REST APIs, Microservices, Spring Security, Hibernate, JPA, JWT Authentication, API Design
- Databases:** MySQL, PostgreSQL
- Architecture & Concepts:** System Design, Distributed Systems, OOP, Data Structures, API Security
- Testing:** JUnit 5, Mockito
- Tools & DevOps:** Docker, Git, Postman, Swagger, GitHub Actions (CI/CD)
- Cloud & Deployment:** Oracle Cloud, Vercel, Netlify, Render, Hostinger
- Frontend:** React.js, Next.js, Redux, HTML, CSS

EXPERIENCE

Python Developer Intern — Timoz Digital Era Pvt. Ltd., Bangalore Oct 2024 – Dec 2024

- Engineered scalable backend APIs and designed backend service architecture using Django, optimizing database queries for a real-time visualization platform serving over 10,000 users efficiently.
- Developed an advanced image processing pipeline using Python, OpenCV, and NumPy, achieving approximately 95% rendering accuracy through optimized affine transformations and masking techniques.
- Implemented testing pipelines and structured code review processes, reducing production bugs by nearly 90% while improving code quality, maintainability, and system reliability.

PROJECTS

Phoneless Biometric Payment System | Spring Boot, Java, MySQL, React.js, Microservices, Razorpay API, Docker | Jan 2026 – Mar 2026

- Architected a secure face-authenticated wallet system using Spring Boot and Java, achieving real-time transaction latency below 200 milliseconds through efficient backend processing and optimized API design.
- Developed a token-based authentication architecture using JWT, reducing authentication overhead by 60% and significantly enhancing transaction throughput and scalability under concurrent user loads.
- Built and deployed scalable microservices-based REST APIs on Oracle Cloud, ensuring secure payment integration, SSL configuration, and reliable cross-platform access for a seamless user experience.

E-commerce Web Application Using Microservices | Java, Spring Boot, React.js, MySQL, Docker, Razorpay API | Nov 2025 – Dec 2025

- Architected a microservices-based backend system using Spring Boot, Eureka service discovery, and Resilience4j circuit breakers to ensure high availability, fault tolerance, and modular scalability.
- Improved REST API performance and database queries, reducing average response time by 30–35%, while enhancing system efficiency and ensuring secure transaction handling.
- Implemented JWT-based authentication and automated CI/CD pipelines using GitHub Actions, enabling seamless deployment across cloud platforms and maintaining consistent, production-ready application environments.
